Medical Affairs Consultant*

Dr. Awad Omer

*General Manager/
Clinical Consultant*

Ms. Dawn Kenney OBE RRC

Nursing Consultant

Ms. Hala Bhat

*Marketing and Business
Development Consultant*

Rajendiran Rathinam

*Senior Consultant -
Biomedical Engineering*

We Specialize In

Providing our clients various healthcare solutions & tools such as:

1- Full fledged -Hospital Information System including:

A. Electronic medical records (HIS/EMR system) with high end features of interoperability capabilities & fully compliant with Cybersecurity standards & requirements.

B. Telehealth Platform

2- Revenue Cycle Management automation with claims management and revenue generation.

3-Enterprise Research and Grants Operations Software.

4- Artificial intelligence (AI)& Augmented Reality -Surgery Vision solution“ a virtual reality solution, which helps surgeons to perform better by providing hundreds of separate CT/MRI slices in a single stereoscopic 3D model with advanced (automated) planning tools .

5 . Artificial intelligence (AI) :An interpretation tool that screens for tuberculosis and other abnormalities

Why Do Customers Choose the ohumDoc Platform?

Appointments and Schedule

Virtual clinical practice

e-prescription

Digital Payment

Access reports

EMR

Seamless Integration

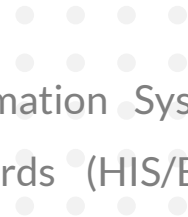

Increase user & revenue

01. HIS/EMR SYSTEM

IS a Full fledged -Hospital Information System including electronic medical records (HIS/EMR system) is one of the best end-to-end fully integrated cloud-based EMR. The proposed platform is a world-class, most affordable, highly sophisticated, and intuitive platform and processes to improve patient safety, clinical outcomes and lower costs while enabling research.

02. Enterprise Research and Grants Operations Software

Simplify the way to manage research and grants for sponsored and funded research from proposal submission to reviews until award, to progress monitoring until close out and then publication. It ensures efficient and accurate research and grants management built for the research life cycle.

The software supports the needs of Research Institutions, Life Sciences Companies, Funding and Sponsoring Organizations, Contract Research, university .

03. Surgery Vision Solution

is an Artificial intelligence (AI) & augmented reality Surgery Vision solution “ a virtual reality solution, which helps surgeons to perform better by providing hundreds of separate CT/MRI slices in a single stereoscopic 3D model with advanced (automated) planning tools leading for better performance in surgery (more patients, less failures, shorter OR time).

04. Artificial intelligence Algorithms Tool (Qure.ai)

The artificial intelligence algorithm underlying qXR is trained to detect not only classical primary pulmonary TB, but also atypical manifestations. It can be used to simultaneously screen for COPD, lung malignancies in high-risk populations, and certain cardiac disorders.

QXR is a CE-certified automated chest X-ray interpretation tool that screens for tuberculosis and other abnormalities

05. PHARMACY AUTOMATION & RBOTIC SYSTEM

Configurable system in relation to required capacity and space

- High storage capacity.
- High loading and delivering speed (8/10 seconds per piece) with the "Multi-picking" function (multiple hold from 1 to 6 pieces):
- Low noise (suitable for a hospital environment);
- Front door available in case of emergency /or failure of the system;
- Free Pharmacy staff for Pt. education & counselling
- Full report on drug bar levels, drugs expires checks, so drugs inventories are very well managed.

06. PHARMACY -VENDING MACHINES (SPOKE & HUB - CONCEPT)

Pharmasel f24 is an automated prescription collection system that gives your patients fast, simple and secure access to the medicines they need. It means prescriptions are available to be collected 24/7, whenever it's most convenient for them. For you, it means more time to deliver patient care and a new way of growing your dispensing income.
